(54) Title: AUTOMATIC GENERATION OF CORRESPONDENCE VIA AN EMAIL INTERFACE

System Architecture

(57) Abstract: System and method for generation (13), graphical composition (17), and delivery (14) of conventional forms of written correspondence. The conventional form of written correspondence is generated from a correspondence message of a text Internet e-mail message (11). A sender initiates correspondence in a variety of formats, to multiple recipients or to group(s) of recipients (10), wherein a security (15) is provided against unauthorized generation of correspondence by assumed SMTP e-mail identities, thereby preventing "forgery" a correspondence from the sender.
